Melissa's Garden answer key.

Which flower is located at (1, 4) on the grid? **daisy**

Which flower is located at (6, 6) on the grid? **daffodil**

Where is the lily located on the grid? **(3, 7)**

Which flower is located at (7, 2) on the grid? **rose**

Where are the hibiscus flowers located? **(2, 1) (4, 3) (1, 6)**

The goal of this lesson is for the student to be able to identify points on a grid.

The student should know that the first number in an ordered pair tells how many units to go to the right.

The student should know that the second number in an ordered pair tells how many units to go up.
