

## Cursive Handwriting Practice

(worksheet 1)

Carefully and neatly copy the following passage.

---

New measurements from a NASA satellite show a dramatic cooling in the upper atmosphere that correlates with the declining phase of the current solar cycle. For the first time, researchers can show a timely link between the Sun and the climate of Earth's thermosphere, the region above 100 km, an essential step in making accurate predictions of climate change in the high atmosphere.

Handwriting practice lines consisting of multiple sets of horizontal lines, each set including a solid top line, a dashed midline, and a solid bottom line.

# Cursive Handwriting Practice

(worksheet 3)

Carefully and neatly copy the following passage.

Wind tunnels are tube-shaped facilities that allow engineers to move air over a vehicle as if it were flying. They help researchers to learn more about how an aircraft will fly. NASA uses wind tunnels to test scale models of aircraft and spacecraft. Some wind tunnels are big enough to hold full-size versions of vehicles. By moving air around an object, the wind tunnel simulates the conditions of the object in flight.

Handwriting practice lines consisting of multiple sets of solid top and bottom lines with a dashed midline.

# Cursive Handwriting Practice

(worksheet 4)

Carefully and neatly copy the following passage.

The Hubble Space Telescope is a large telescope in space. It was launched into orbit by space shuttle Discovery in 1990. Hubble orbits about 550 kilometers (342 miles) above Earth. It is the length of a large school bus and weighs as much as two adult elephants. Hubble travels about 5 miles per second, and is powered by sunlight.

Handwriting practice lines consisting of solid top and bottom lines with a dashed midline, repeated 15 times for copying practice.
