Using the ***I'm Learning Multiplication Facts*** printouts.

These pages may be printed and used for self-drill exercises.

1. Print the pages you wish to have your child practice.
2. Cut the pages in half as shown.
3. Fold each of the halves in half with unprinted backs together.  
(For each half page, you should now have a column of problems on one side and a column of answers on the reverse side.)
4. Child can then view the problem and provide an answer.
5. Child can check the answer by flipping the card over to reveal the correct answer.

Cut each full page in half.

Then fold each of the cut pages in half.

Child can then solve problem.

Flip card over to check answer.
