

Identifying Triangles by Sides

Triangles can be classified by their sides. A triangle with all sides of equal length is an equilateral triangle. A triangle that has two sides with the same length is an isosceles triangle. A triangle where all sides are different lengths is a scalene triangle. Review the triangles below and select the correct answer.

- equilateral triangle isosceles triangle
 scalene triangle

- equilateral triangle isosceles triangle
 scalene triangle

- equilateral triangle isosceles triangle
 scalene triangle

- equilateral triangle isosceles triangle
 scalene triangle

- equilateral triangle isosceles triangle
 scalene triangle

- equilateral triangle isosceles triangle
 scalene triangle

- equilateral triangle isosceles triangle
 scalene triangle

- ✓ An isosceles triangle can be a right triangle.
- ✓ All three angles of an equilateral triangle are 60°
