

Math Squares

Multiply the numbers going across. Multiply the numbers going down. Then multiply your answers together to fill in the last square. The first one has been done for you.

$2 \xrightarrow{\times 4} = 8$

2	4	8
6	1	6
12	4	48

$12 \xrightarrow{\times 4} = 48$

Diagram description: A 3x3 grid with numbers. The first row contains 2, 4, and 8. The second row contains 6, 1, and 6. The third row contains 12, 4, and 48. The 48 is highlighted in yellow. Arrows and equations show that 2 x 4 = 8, 2 x 6 = 12, and 12 x 4 = 48.
